

Our visit to the library during book week
Whale watching and kite flying in the local park
overlooking the sea

We have incorporated many aspects of
environmentally sustainable living by
encouraging the children to recycle lunch scraps
and use the worm farm juice to fertilise our
growing vegetables.

The children have prepared a range of healthy
foods and become increasingly aware of taking
care of their bodies with healthy eating.
They have taken part in a variety of music
experiences that have enhanced their knowledge
of musical concepts.

The children have been immersed in literacy,
storytelling and imaginative stories from other
cultures.

During science week , we were visited by a
scientist who set up experiences about
“reactions” in science and how everyday
materials can be used to teach about physical
concepts.

We have our disco/bbq to look forward to this
Friday and of course our sing-a-longs and parties
with families next week.

The graduation ceremony for The Kookaburra
group going onto school is a Dover Heights
Community Preschool tradition and sure to bring
tears to parent’s eyes!

To all involved with our community, I wish you a
safe and happy break, however you celebrate
with your family and a wonderful 2017

warmest regards,
Helene
